Introduction to Falun Dafa

Falun Dafa, also known as Falun Gong, is a practice for benefiting physical health and elevating the mind. Introduced by Mr. Li Hongzhi in China, the practice consists of five gentle exercises including meditation, and diligent effort on the part of practitioners to follow the universal principles of Truthfulness-Compassion-Forbearance in daily life. Falun Gong is not only beneficial to one's own health and well-being, it also benefits others. Although the practice originated in China, today it is practiced throughout the world by people of all races and walks of life. In the face of the most brutal and vicious persecution perpetrated on them by the Chinese Communist Party, Falun Gong practitioners have found the spiritual strength to resist peacefully and tirelessly by upholding the principles of Truthfulness-Compassion-Forbearance.

Practicing Falun Gong Cured My Many Illnesses, Including a Congenital Heart Defect

(Clearwisdom.net) I am a middle school teacher who is 62 years old. I had many illnesses before I began practicing Falun Dafa. For almost 26 years I had suffered from illnesses including a congenital heart defect, pulmonary tuberculosis, cervical vertebra ossein proliferation, Meniere's syndrome and an attachment to sleep. I had worn three pairs of special glasses for older people by the time I was in my early forties. Towards the end, everything was blurry when I read. I also had rheumatoid arthritis and other persistent illnesses.

I began Falun Dafa practice in January 1996. I did not need the special glasses for older people after I read *Zhuan Falun*, the principal text of Falun Dafa, three times. I could even see very small characters. All of my persistent illnesses disappeared after practicing, and my whole body felt light. From my childhood to the time before I started to practice, my lips were always white, having an inadequate blood supply due to my heart problems. I had always carried heart pills with me since the 1970's. After practicing, my lips looked as if they always had lipstick on them.

In March 2001, I was illegally arrested and held in the Dongcheng District Detention Center in Beijing, for going to Beijing to appeal for justice for Falun Dafa. I went on a nine-day hunger strike in August 2004, to protest the persecution. Handcuffed and shackled, I was taken for a medical examination. The doctor looked at the ultrasound image for a long time, and also asked all the doctors working there to come and look at it. Finally, the doctor in charge said, "Practicing Falun Gong has filled up the gap in her atrium [*a chamber in the heart*]."

During the five years I spent in the forced labor camp, I was taken to the provincial hospital twice to have medical examinations. The first time was in August 2001, and the second time was in August 2004. The doctor who did the medical examination was the doctor in charge. He asked all the other doctors to come to his lecture. He said, "At noon these ten patients had damage to their hearts. This afternoon there is no damage. Practicing Falun Gong has truly healed their hearts."
