## An Update on Falun Dafa Worldwide

VOLUME 6 ISSUE 8 APRIL 29, 2011

### CCP Routinely Administers Harmful Drugs to Falun Gong Practitioners as a Means of Torture

**(Clearwisdom.net)** A widely applied method used by the Chinese Communist Party (CCP) to persecute Falun Gong practitioners is the administration of nerve-damaging drugs. Their use is part of the CCP's brutal campaign to force practitioners to renounce Falun Gong.

Falun Gong practitioners in state detention are often injected with unknown drugs or drugs are added to their food. The victim may experience general malaise, difficulty walking, rapid decline of reaction and memory, confusion, and organ damage. Some practitioners suffer from complete mental collapse or coma. In many cases, practitioners are tortured to the point of paralysis, and some have died.

A Shandong Province official, surnamed Jiang, was taken to the Weifang Forced Labor Camp in November 2005 because he was a Falun Gong practitioner. For four months, unknown drugs were fed to Mr. Jiang. Some caused dizziness or headaches. Others caused his internal organs to swell and left him in extreme pain. He also experienced chest pains, difficulty breathing, and stomach pain. In addition, the drugs caused Mr. Jiang to suffer intense sweating, coldness, severe itchiness, high fever, pain in his muscles and joints, diarrhea, as well as constipation and inability to urinate.

**Ms. Yue  
Changzhi**

Ms. Yue Changzhi, 70, was an engineer in the China Aerospace Ministry. She was illegally held in the Beijing Women's Prison. Towards the end of 2004, she suddenly felt as if she was becoming foggy-headed, and she was in extreme pain. Ms. Yue said, "I could no longer find my way to the restroom although I had been there ten months. I had severe pain all over my body."

Mr. Kang Hong graduated from the Pediatrics Department at Chongqing Medical University. He spent eight years in prison because he refused to renounce his belief in Falun Gong. Mr. Kang was taken to the Xishanping Labor Camp Central Hospital, where doctors gave him injections. Shortly after, Mr. Kang yelled incoherently and even rubbed feces on his face. He could not recognize his mother when she came to visit him. These are symptoms of a drug-induced nervous breakdown.

**Ms. Dong  
Jingzhe**

In March 2005, guards at Masanjia Forced Labor Camp shackled Ms. Dong Jingzhe, a 32-year-old advertisement designer, to a metal bed. They injected her with over 70 vials (500 ml per vial) of an unknown drug. The drug caused paralysis in her legs.

**Ms. Zheng  
Dezhen**

Ms. Zhang Dezhen, 38 years old, was a biology teacher in Mengyin County Sixth High School. On September 19, 2002, she was arrested and detained in the Mengyin County Detention Center. Ms. Zhang went on a hunger strike to protest the illegal imprisonment, and was force-fed in the Mengyin County Traditional Chinese Medicine Hospital multiple times. On January 31, 2003, Chinese New Year's Eve, she died after being injected with an unknown drug.

### Introduction to Falun Dafa

Falun Dafa, also known as Falun Gong, is a practice for benefiting physical health and elevating the mind. Introduced by Mr. Li Hongzhi in China, the practice consists of five gentle exercises including meditation, and diligent effort on the part of practitioners to follow the universal principles of Truthfulness-Compassion-Forbearance in daily life. Falun Gong is not only beneficial to one's own health and well-being, it also benefits others. Although the practice originated in China, today it is practiced throughout the world by people of all races and walks of life. In the face of the most brutal and vicious persecution perpetrated on them by the Chinese Communist Party, Falun Gong practitioners have found the spiritual strength to resist peacefully and tirelessly by upholding the principles of Truthfulness-Compassion-Forbearance.

### About Clearwisdom

Clearwisdom.net is the most authoritative source of information about the practice of Falun Gong and about the persecution of Falun Gong in China, reporting timely news and events happening inside China as well as from the more than 100 countries around the world where Falun Gong is practiced. Clearwisdom responsibly publishes the experiences and understandings of practitioners themselves, who submit the majority of the articles.

## Falun Gong Cured an Incurable Disease

**(Clearwisdom.net)** I live in an outlying village near Zhuanghe City, Liaoning Province, China. My husband, 41, was suddenly fatigued one day in July 2010. He checked into the city hospital on August 20 and was diagnosed with hepatic necrosis. The doctor told us it was untreatable and terminal. His condition worsened so much that I had him transferred to the Dalian City No. 6 Hospital on August 25.

My sister, who is a Falun Gong practitioner, called us at the time and advised my husband to sincerely recite, “Falun Dafa is good” and “Truthfulness-Compassion-Forbearance is good.” She also sent us an MP3 player with Mr. Li Hongzhi’s lectures. I played it to him whenever I had time. After listening to the lectures for two days, my husband started to hiccup and vomited. He felt much better afterward. A test the following day showed that his liver cell count had miraculously rebounded. He was discharged on September 8.

To help him recuperate quicker, my sister sent us a Falun Dafa exercise DVD. We listened to Mr. Li’s lectures and practiced the exercises every day. My husband regained his health and went back to work on October 10. He was examined two months later during a follow-up visit and the results were normal. Indeed, Falun Gong cured the disease that the hospital had pronounced incurable.

## A Dying Patient Saved

**(Clearwisdom.net)** My father-in-law had a high fever and was rushed to a hospital on September 20, 2010. He was diagnosed with severe pneumonia. Although his fever was gone a few days later, his cough persisted. When I visited him, I encouraged him to say with me over and over, “Falun Dafa is good; Truthfulness-Compassion-Forbearance is good.” During my two-hour visit, he hardly coughed at all. When I left I told him that as long as he continued reciting these phrases in his heart, he would soon recover. He did—and was discharged from the hospital three days later.

**Quincy residents learn about Falun Dafa**

**Falun Gong practitioners demonstrate the exercises**

## Quincy, Massachusetts: Falun Gong Stands Out in Chinese New Year Celebration

**(Clearwisdom.net)** The 23<sup>rd</sup> Annual Chinese New Year Festival was held on February 3, 2011, at North Quincy High School. The festival attracts thousands of people every year to Quincy’s Chinatown. Falun Gong practitioners participate in the event each year by setting up a booth where they demonstrate the Falun Dafa exercises and talk to people about the persecution of Falun Gong in China.

Quincy resident Katey was interested in the Falun Gong exercises after seeing the practitioners’ demonstration. She said that she would go to a nearby practice site the next day to learn the exercises.

A woman stopped in front of the Falun Gong booth and said that she knows Falun Dafa practitioners to be kind people. “We attended the Shen Yun performance yesterday in Boston, it was really amazing!” she said.

Another woman walked up to the Falun Gong booth and made a Heshi gesture and respectfully bowed to the portrait of Master Li Hongzhi.

Meaghan Raftery from New York has seen Falun Gong anti-torture exhibits in New York, and understands how cruel the Chinese Communist Party (CCP) is in the persecution. She said that people should have sympathy and be compassionate and caring for others. She condemned the CCP’s inhuman atrocities committed against Falun Gong practitioners.

The Falun Gong booth also attracted the attention of a journalist from the largest local newspaper—*The Patriot Ledger*. He stopped by the booth to interview the practitioners for a news report.
